Hello, I am a full stack web developer on Upwork.

Upwork is freelancing site for web developers. I have rich experiences in Upwork and my monthly income was $3000+. But unfortunately, my account was suspended recently and I lost good clients/jobs.

Due to upwork policy, I am not able to recreate my Upwork account on my computer and my ip address.

So I am looking for a candidate who can rent me his Upwork account.

In exchange, I will give you $. If I earn $1000+, I will pay 10% of my Upwork income. So if I earn $3000+, you will receive $300 in a month.

If I can not earn anything, I will send fixed price for renting your account.

In that case, I will send money like this.

First month: $50

Second: $70

Third: $90

After fourth: $100

Payment method: Crypto(best for me), Paypal, Payoneer

How to create Upwork account.
1. Create gmail with your info.
2. Create Upwork account.
   Should create account with your name, gmail and your pictures.
   In that case, we should add work experience and education. I will help you at that time.
3. ID verification
   It can be done in 10 mins.
   Upwork requires id verification. In that case, you should verify with your id card. When verification, Upwork will check your name and picture with your id card.
4. Payment integration
   When I earn money using Upwork account, I should withdraw money. For that, we should add payment method(Paypal, Payoneer) at Upwork.

I will send the first monthly payment after third step. That time will be payment day.

The more earn money from upwork, the more money you will receive. This will be long term.

If you are interested, please send me message in my communication.
